Introduction to Intercultural

Communications

OL351

Students taking this course will learn the definition of culture and will be introduced to intercultural communication theories such as differences in gestures, personal spaces, and customs. By identifying intercultural issues in North American society, students will learn how they can apply intercultural communication theories to their daily lives and how they can respect and understand persons from other cultures. The main objective of this course is to create an environment in which students will feel comfortable communicating with people from different cultures and backgrounds. This course will be of interest to workers in health services, education, human resources, and business as well as those people who want to enhance their communication skills particularly as they apply to communicating with people from other cultures.

Ozone Depletion Prevention IB802

Canada's Ozone Layer Protection Awareness Training Program is based on Environment Canada's "Code of Practice for Elimination of Fluorocarbon Emissions in Refrigeration and Air Conditioning Systems". This course will deal with environmentally-correct equipment design, proper handling of refrigerants, and will prepare participants for complying with provincial regulations covering refrigeration and air conditioning systems. Each attendee will receive the Participant Manual to refer to in class and take home. Participants who achieve a mark of 75% or better on the exam will receive an Ozone Depletion Prevention (ODP) card. This card must be renewed every five years for those who purchase or handle refrigerants across Canada. Note: this course is strictly theory and does not incorporate hands-on training. Anyone in residential, commercial, industrial, domestic, automotive and mobile cooling applications would benefit from taking this course. This course is offered via distance education where the students and instructor in Thunder Bay are joined by students from across Northern Ontario at a Contact North site. Thunder Bay students attend class at Contact North, 104-1139 Alloy Drive Thunder Bay. Attention Employers or Sponsors: If you wish to sponsor one or more employees or clients for a specific course, we can simplify the process for you. Call us for details (807) 475-6550.
