### **1.1 AIIMS, New Delhi**

All India Institute of Medical Sciences was established by an Act of Parliament of 1956 as an autonomous institution of national importance and its objectives and functions were defined. By virtue of this Act, the Institute awards its own medical degrees, diplomas and other academic distinctions. The degrees and diplomas awarded by the Institute under the All India Institute of Medical Sciences Act are recognized medical qualifications for the purpose of the Indian Medical Council Act and notwithstanding anything contained in the Medical Council Act, are deemed to be included in the first schedule of that Act, entitling the holders to the same privileges as those attached to the equivalent awards from other universities of India.

The Institute (AIIMS, New Delhi) is a residential University in which the faculty members, staff and the students live on campus. There are 8 hostels for undergraduate students (6 for boys and 2 for girls) with a capacity to accommodate 562 students.

### **1.2 Fourteen other AIIMS**

Under the Pradhan Mantri Swasthya Suraksha Yojana [PMSSY] Forteen All India Institute of Medical Sciences have already been established similar to AIIMS, New Delhi. The six AIIMS viz. Bhopal, Bhubaneswar, Jodhpur, Patna, Raipur, Rishikesh have been continuing with intake of 100 students. However, as per letter No. A.11013/1/2016-SSH, GOI, Ministry of Health & Family Welfare (PMSSY-IV Section) dated 9<sup>th</sup> November, 2018 it has been decided to increase the MBBS seats provisionally from 50 to 100 in the AIIMS Mangalagiri and AIIMS Nagpur and intake of 50 MBBS seats in six new AIIMS viz. Raebareli, Kalyani, Gorakhpur, Bhatinda, Deogarh & Telangana from the Academic Year 2019-20. As per the directives of the Ministry selection for admission will be done through the same Entrance Examination by which candidates are selected for AIIMS, New Delhi. The admission will be done on the basis of merit-cum-choice of the candidates.

### **2.1 AIIMS, New Delhi**

The prime focus of the Institute (AIIMS) is to develop patterns of teaching in undergraduate and postgraduate medical education in all the branches so as to demonstrate a high standard of medical education to all medical colleges and allied institutions in India. The other important objectives of the Institute is to bring together in one place educational facilities of the highest order for the training of personnel in all the important branches of health activities and to attain self-sufficiency in postgraduate medical education. The educational principles and practices being adopted are those which are the best suited to the needs of the country. Adaptation of education to meet the problems of community health is a major preoccupation. To this effect the AIIMS New, Delhi has been trying to initiate a model educational programme in the Ballabgarh Community Development Block in collaboration with the Haryana Government. The Institute has also been able to initiate model educational programme in Community Medicine at the urban field practice area in Malviya Nagar, New Delhi. Emphasis is laid on the active learning process and on the cultivation of scholarly habits and scientific methods. The first batch of undergraduate medical students was admitted to the AIIMS, Delhi in the year 1956. Earlier, the Institute had been admitting 50 students every year. In the 2008 session, the intake was increased to 77 and from 2017 the intake was 107 for the M.B.B.S. Course. The number of students admitted is kept relatively low to ensure an adequate teacher student ratio. The undergraduate curriculum is constantly reviewed at the Faculty and Staff Council levels and the required changes in the curriculum are brought about in order to evolve a pattern which is the most suitable for the Indian needs and conditions.

Undergraduate medical students get sufficient impetus for higher studies as the Institute provides facilities for postgraduate degrees in almost all the branches of medical sciences. At present, the AIIMS, Delhi is awarding post-graduate degrees in about 55 different specialties /super specialties.

## 2.2 Fourteen other AIIMS

## 8.7 MINIMUM CUT-OFF SCORES

In accordance with decision of the Governing Body, AIIMS, New Delhi dated 26.11.2009 and the past practice adopted by AIIMS, New Delhi, the minimum cut-off necessary in the Entrance Examination to determine eligibility for admission is:

General Category	:	50%
OBC (Non Creamy Layer)	:	45%
SC / ST	:	40%
PWBD	:	Cut-offs of the respective category

Since the examination will be held in two days in two shift per day, a Normalization Procedure will be used (see 8.8); the Percentile score corresponding to the above cut-offs will be used to determine eligibility. In the event of the percentiles for the four shifts in two days being dissimilar / unequal, the lower of the four will be the eligibility cut-off for that category for all candidates (i.e. all shifts).

For example if the 50% marks correspond to a Percentile score of 90 in Shift 1 , 92 in Shift 2 , 89 in Shift 3 and 88 in Shift 4 then all those equal to or above 88 Percentile (Percentile score of 100 to 88) in all shifts will become eligible in General Category. Similar method will be adopted for the other categories to determine eligibility cut-offs. In case the examination is held in lesser number of shifts the same principle shall apply.

## 8.8 NORMALIZATION PROCEDURE

This year, since there would be two shifts per day, a Normalization Procedure is being adopted as decided by experts based on analysis of past MBBS Entrance Examinations conducted by AIIMS, New Delhi. This will be utilized to decide on the inter-se merit / ranking [used during Online Seat Allocation / Counseling for allotment of seats] between those who appeared for the examination.

The normalization procedure that will be adopted is based on PERCENTILES.

### Percentile Scores

Percentile scores are scores based on the relative performance of all those who appear for the examination. Basically the marks obtained are transformed into a scale ranging from 100 to 0 for each group (shift) of examinees.

The Percentile Score indicates the percentage of candidates that have scored EQUAL TO OR BELOW (same or lower raw scores) that particular Percentile in that examination. Therefore the topper (highest score) of each group (shift) will get the same Percentile of 100 which is desirable. The marks obtained in between the highest and lowest scores are also converted to appropriate Percentiles.

The Percentile score is the Normalized Score for this examination.

**The Percentile Scores will be calculated to 7 decimal places to avoid bunching effect and therefore reduce ties.**

In this method of scoring the HIGHEST SCORE in each paper (irrespective of the raw scores / percentage obtained) will be the 100 Percentile indicating that 100% of candidates have scores *equal to or lesser than* the highest scorer/ topper for that shift. For example, in Shift 1 if the highest score is 80%, in Shift 2 the highest score is 82%, in Shift 3 the highest score is 78% and in shift 4 the highest score is 79%, **all the highest scores** would be normalized to 100 Percentile for their respective group / shift.

The lowest score would have a percentile depending on the total number of candidates who have taken the examination. Supposing 100000 students have taken the examination in a Shift and the highest score (A) for that group / shift is 160 / 200 (80%) and the lowest score (B) is – 3 / 200 (-1.5%). If there is no other candidate who has scores equal to either A or B, then the Percentile Score of A, the top scorer, shall be 100 [because all or 100% of candidates have scored EQUAL TO OR LESS THAN A]. The Percentile Score of B, the lowest scorer, shall be 0.001 since the percentage of candidates with scores EQUAL TO OR BELOW would be 0.001 [(1/100000)\*100]. If another candidate (C) had a raw score similar to that of A, then both A and C would have a Percentile Score of 100. Similarly if another candidate (D) had a raw score equal to that of B then both B and D would have a Percentile score of 0.002 [(2/100000)\*100]. Ties would therefore have similar Percentiles.

The following is a further explanation of the interpretation of the scores in an examination (such as one shift) with **100 candidates**.

- If candidate A's Percentile score is 100, it indicates that amongst those who have taken the examination, 100% have scored either EQUAL TO OR LESS THAN the candidate A. It also indicates that no candidate has scored more than candidate A.
- If candidate B's Percentile score is 90, it indicates that 90% of the candidates who have taken the examination have scored either EQUAL TO OR LESS than candidate B. It also indicates that remaining candidates have scored more than candidate B.
- If candidate C's Percentile score is 50, it indicates that 50% of the other candidates who have taken the examination have scored either EQUAL TO OR LESS than candidate C. It also indicates that remaining half of those who took the examination have scored more than candidate C.
- If candidate D's Percentile score is 30, it indicates that 30% of the candidates who have taken the examination have scored either EQUAL TO OR LESS than candidate D. It also indicates that remaining have scored more than candidate D.
- If candidate E's Percentile score is 1, it indicates that none of the candidates who have taken the examination have scored either EQUAL TO OR LESS than candidate E. It also indicates that all remaining candidates who took the examination have scored more than this candidate .

## **8.9 METHOD OF RESOLVING TIES**

The overall merit / ranking shall be based on the Percentile scores of the Total Raw Scores.

The method adopted for breaking ties (similar Percentiles) shall be:

1. Biology: Higher Percentile scores in Biology will result in higher ranking
2. Chemistry: If Biology Percentiles do not break the tie, higher Percentile scores in Chemistry will result in higher ranking
3. Physics: If Biology and Chemistry Percentiles do not break the tie, higher Percentile scores in Physics will result in higher ranking
4. Age: If Biology, Chemistry, Physics Percentiles do not break the tie, the candidate elder by age will be ranked higher

## **8.10 BRIEF DESCRIPTION OF THE STEP-BY-STEP PROCEDURE FOR NORMALIZATION AND OF MERIT / RANKING IN THE AIIMS MBBS ENTRANCE EXAMINATION 2019**

### **1. Distribution of Examinees in two shift per day**

Applicants would be allotted into four groups randomly such that these groups are approximately equal in number. These four groups would be First, Second shifts on Day 1 and Day 2 . In the event of lesser number of shifts, the candidates will be divided accordingly. This will ensure that there is no bias in the distribution of candidates who take the examination.

Further, with a large population of examinees spread over the entire country such possibility of a bias becomes remote.

## 2. Preparation of Results for each Shift

The examination results for **each shift** would be prepared in the form of

Raw Scores

Percentages

Percentiles (**up to 7 decimal places**) **separately** for each of the four subjects (Biology, Physics, Chemistry and General Knowledge) and the Total. *The Percentile of the Total shall not be an aggregate or average of the Percentile of individual subjects.*

The following 5 Percentiles would be calculated for each student

*Let  $T, S_1, S_2, S_3, S_4$  denote the raw marks obtained in Total, Biology, Chemistry, Physics and General Knowledge:*

Total Percentile (TP):  $100 \times \frac{\text{No. of candidates from the group with TOTAL MARKS} \leq T}{\text{No. of candidates in the group / shift}}$

Biology Percentile (S1P):  $100 \times \frac{\text{No. of candidates from the group with BIOLOGY} \leq S_1}{\text{No. of candidates in the group / shift}}$

Chemistry Percentile (S2P):  $100 \times \frac{\text{No. of candidates from the group with CHEMISTRY} \leq S_2}{\text{No. of candidates in the group / shift}}$

Physics Percentile (S3P):  $100 \times \frac{\text{No. of candidates from the group with PHYSICS} \leq S_3}{\text{No. of candidates in the group / shift}}$

General Knowledge Percentile (S4P):  $100 \times \frac{\text{No. of candidates from the group with GENERAL KNOWLEDGE} \leq S_4}{\text{No. of candidates in the group / shift}}$

## 3. Preparation of Overall Rank / Merit List

The Percentile scores for the Total Marks for both shifts as mentioned above would be merged and arranged so as to derive an overall Merit List / Ranking.

**Please Note that the percentile score is not the same as percentage of marks obtained.**

## 4. Resolving Ties

In case of a tie (identical Total Percentile) the order of deciding higher rank / merit would be: Percentile in Biology, Percentile in Chemistry, Percentile in Physics, Percentile in General Knowledge, elder by age.

### Example of a hypothetical scenario in the preparation of Overall Ranking / Merit

1. Assuming there are 100000 candidates in each shift the Hypothetical Ranking would be :

#### PERCENTILE : SHIFT 1 on DAY 1

The diagram illustrates three distinct groups of candidates who have tied scores. Group 1 consists of five candidates (A1015, B2050, B2035, C3105, D4240) all achieving a total score of 100.0000000. Group 2 consists of two candidates (B2020 and C3641) both achieving a total score of 99.9872355. Group 3 consists of four candidates (A1001, B2041, C3044, D4511) all achieving a total score of 0.0010000. Blue arrows from each group point to the word "Ties" located to the right of the table.

4. Please note that there are some candidates with same Percentile Scores (Ties). In the next step the ties would be resolved with the sequential application of Percentile Scores of

- Biology
- Chemistry
- Physics
- Date of Birth (age)

Each of the above would be taken into consideration in the above sequence till the tie is resolved

*Note: Percentile of General Knowledge and Aptitude are not taken into consideration for resolving ties.*

The Final Ranking /Merit would be prepared after using resolving ties:

### 9.1 MERIT LIST

Based on the result of the Competitive Entrance Examination, merit lists will be prepared as below based on Percentile Scores:

- (a) **Common Merit list:** Subject to the Govt. of India, DOPT. O.M.No. 36011/1/98. Estt. (Res), Dated 1<sup>st</sup> July 1998, it is clarified that only such SC/ST/OBC candidates who are selected on the same standard as applied to general candidates shall not be adjusted against reserved vacancies. In other words, when a relaxed standard is applied in selecting an SC/ST/OBC candidates, for example in the age-limit, experience, qualification, permitted number of chances in written examination, extended zone of consideration larger than what is provided for General category candidates etc. the SC/ST/OBC candidates are to be counted against reserved vacancies. Such candidates would be deemed as unavailable for consideration against the unreserved vacancies. Therefore a reserved candidate will be considered on General Seat only if no relaxation of the eligibility level (i.e. % of marks) and at cut-off level in MBBS Entrance Examination is given.
- (b) **Scheduled Caste candidates list**

The details of the schedule guideline and procedure will be intimated in due course on website [www.aiimsexams.org](http://www.aiimsexams.org).

- 9.1.1 Inter se merit of two or more candidates in the same category obtaining equal total Percentile Scores in the competitive Entrance Examination will be determined in order of:
- (a) Candidates obtaining higher in Biology in the Entrance Examination.
  - (b) Candidates obtaining higher in Chemistry in the Entrance Examination.
  - (c) Candidates obtaining higher in Physics in the Entrance Examination.
  - (d) Candidates older in age.

For detailed explanation refer to section 8.
